The Priovino Classic is so easy to use

Set-up and operation

1. Plug the device into an electrical socket using the power cord.
2. Switch on the device using the On/Off button (A) – blue digital temperature display lights up.
3. Press the set button (B) – the display begins to flash.
4. Use the plus (C)/minus (D) buttons to enter the desired temperature.
5. Press set button (B) once again to confirm the temperature setting – the display stops flashing.
6. The desired temperature setting will now be seen in the display.
7. Place the wine bottle in the bottle chamber.

Charging the battery (for devices equipped with a battery)

1. Insert the charger plug of the battery charger into the socket on the underside of the cooler.
2. Plug the battery charger into an electrical socket using the power cord. The lower LED will light up in red.
3. While the battery is being charged, the upper LED flashes in green. Once charging is completed, the green LED stops flashing.
4. Disconnect the battery charger from mains power and then from the device.
5. When the battery is down to 15 % of full capacity, a blue LED lights up behind the air vents.

Cleaning

Clean the device with a soft, damp cloth and then dry all surfaces thoroughly.

Should you have any difficulties with the operation of the device, please contact us at the following email address:
